Hoof trimming chutes: the asset to get job done

Lame cows can be frustrating and hoof trimming them a chore. For milking the cow, we use nice parlor facilities or milking robots. Obviously, the milk is what we get paid for and it is a reoccurring job, which should be easy. But what about hoof care?

The sooner we get the lame cow looked after, the better the success!

As a professional trimmer, we use chutes to get the job done safe and professional. Below we provide you with an overview of the various hoof trimming chutes available in our North American market. They are put in alphabetical order by name for easy reference.

Note: chutes are also referred to as hoof trimming stalls or hoof trimming crushes.

Alphabetical Index
Here’s an overview of the different hoof trimming chutes covered in this article.

- Dr. Hoof
- Appleton Steel
- Comfort Hoof Care
- Custom Chutes
- KVK Hydra Klov
- Mid Valley Chute

- Paul’s Hoof Chute
